

MAGNESIUM SULPHATE

WATER-SOLUBLE SECONDARY NUTRIENT FERTILISER

MAGNESIUM SULPHATE

Mg 9.5% | S 12.0%

A water-soluble secondary nutrient fertiliser supplying magnesium and sulphur. Supports chlorophyll formation, photosynthesis and balanced crop nutrition. Suitable for soil application, fertigation and foliar spray.

FEATURES & BENEFITS

- Supplies magnesium to support chlorophyll formation and greener foliage.
- Helps correct magnesium deficiency.
- Supplies sulphur for crop nutrition.
- Supports photosynthesis and enzyme activity.
- Water-soluble form for flexible application.

PRODUCT ANALYSIS

Magnesium (Mg), min.	9.5%
Sulphate sulphur (S), min.	12.0%
Water-insoluble matter, max.	1.0%
pH (5% solution)	5.0-8.0

HANDLING & APPLICATION

- Avoid inhaling dust and contact with eyes.
- Wear protective gloves and a mask.
- Wash hands thoroughly after handling.
- Keep away from children, food and feed.
- Jar-test mixtures before use; avoid calcium-based or highly alkaline mixtures.

SUGGESTED APPLICATION

Soil: 10-25 kg / acre

Fertigation: 5-10 kg / acre

Foliar: 5-10 g / litre of water

PACK SIZE: 25 KG

SAFE STORAGE

Store in a cool, dry, well-ventilated place away from sunlight and moisture. Keep the bag tightly closed after use.

APPLICATION NOTE

Rates are from the supplied label. Adjust to crop, growth stage, soil conditions and deficiency. Follow approved label directions and agronomic advice.
